

# Community Action Goal

## Our community is our:

School (Maria Rúbies in Lleida-Barcelona, Catalonia)

## Our issue is:

Waste management. We want to know how much waste all students in our class produce for breakfast (paper, cardboard, aluminium foil...)

## Our goal is to:

reduce our breakfast waste. We also want to make all classmates aware of the need to reduce packaging everyday. Small changes can be powerful!

## The action we will take is:

We are going to make a Boc'n'Roll for each of us, a reusable sandwich bag.

## The digital project type we will use to share our project is:

a website. We think it is a good way to include text, pictures and videos. It may be updated continuously.
